EFICIALS ONLY SECRET/CONTRO CENTRAL INTELLIGENCE ACTION

50X1-HUM

The excess of 2.5 million tons of crude lignite above the plan target of 155 million tons has been included as a reserve and safety margin in order to insure in advance that the plan will be fulfilled.

5. At a mining engineers' conference held at the Kammer der Technik, Berlin, on 19-19 Jamuary 1951, Burdach from, deputy head of HV Kohle, Ministry of Heavy Industry, announced the following target figures of the Five-Year Plan (1951-55) for the production of lignite industry plant equipment:

a. Open cast mines

18 Bucket wheel dredgers of 600-2,400 tens individual weight 25 Bucket chain dredgers of 600-2,240 liters bucket contents 7 Conveyor bridges of 1,400-7,000 tens individual weight 14 Transporters (Absetzer) of 1,100-2,240 liters bucket content

12 Plough regulators (Pflugrücker) and tipping ploughs (Kippenpfluge)

21 Rail-shifting machines

200 Electric locomotives of 75-150 tons service weight

1,000 Standard and narrow gauge surface railway cars 600 Standard and narrow gauge railway cars for coal

b. Briquet factories

13 "Einstrang" presses 24 Double and twin presses

201 "Vierstrang" presses

94 Pipe driers with 2,200 square meters heating surface each

47 Combustion gas dryers

16 High pressure boilers of 80 at. and 30-80 tons per hour steam each

21 Turbogenerators

- 6. The 1951 plan provides that open east lignite mines receive a total of 27,000 tons of standard and narrow gauge rails during that year. Only 800 tons of rails had been delivered by mid-May 1951, and MV Kohle has now been informed by HV Metallurgie (Main Administrative Division for Metallurgy) that it will not receive any further allocations of rails this year, as even the demands of the railways, which are given priority, can not be met because of lack of steel and faulty production.
- 7. The Five-Year Plan first allocated the sum of 2.6 billion east marks to MV Kohle for investment purposes during that period. The figure has now been reduced to 1.8 billion east marks because of lack of funds and unavailability of plants.
